Blue Bell, PA 19424			2194	
			MAIL DATE	DELIVERY MODE
			09/15/2008	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/848,902	Applicant(s) PALECEK ET AL.
	Examiner ANDY HO	Art Unit 2194

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED. (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 24 June 2008.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-21 is/are pending in the application.
 - 4a) Of the above claim(s) is/are withdrawn from consideration.
- 5) Claim(s) is/are allowed.
- 6) Claim(s) 1-21 is/are rejected.
- 7) Claim(s) is/are objected to.
- 8) Claim(s) are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. .
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO/SB/08)

Paper No(s)/Mail Date

- 4) Interview Summary (PTO-413)
 Paper No(s)/Mail Date
- 5) Notice of Informal Patent Application
- 6) Other:

DETAILED ACTION

1. This action is in response to the amendment filed 6/24/2008.
2. Claims 1-21 have been examined and are pending in the application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Yeap U.S Publication No. 2007/0208758.

As to claim 1, Yeap teaches (Fig. 1 and associated specification) a method of transferring data from a first application having a legacy data base located with a legacy data base management system with a first format to a second application within said legacy data base management system employing a second format which is incompatible with said first format comprising:

determining said first format associated with said data; ascertaining a location of said data; packing an identifier of said format and an identifier said location into a message having a predefined format (paragraphs 0006-0008, 0065, 0068 and 0076);

transferring said message from said first application to said second application; unpacking said message to determine said format and said location; and accessing said data by said second application using said indication of said format and said indication of said location (paragraph 0056).

As to claim 2, Yeap further teaches said data further comprises a plurality of data objects (paragraph 0020, 0037).

As to claim 3, Yeap further teaches said predefined format further comprises Extended Markup Language (paragraph 0045).

As to claim 4, Yeap further teaches transferring via a publically accessible digital data communication network (Fig. 1).

As to claim 5, Yeap further teaches said publically accessible digital data communication network further comprises the Internet (Fig. 1).

As to claim 6, Yeap teaches an apparatus comprising:
a first application program located within a first computer and having a data base with a first format (Fig. 1 and associated specification);
a second application program located within a second computer and having a legacy data base with a second format which is incompatible with said first format responsively coupled to said first application program (Fig. 1 and associated specification);

a message having a preexisting format generated by said first application program for transfer to said second application program (paragraph 0042);
a data object responsively coupled to said first application program having an indication of a location and having a an indication of said second format (paragraphs 0006-0008, 0020, 0065, 0068, and 0076); and
wherein said message contains a definition of said location and said second format (paragraphs 0065, 0068 and 0076).

As to claim 7, Yeap further teaches a publically accessible digital data communication network wherein said first application program is responsively coupled to said second application program via said publically accessible digital data network (Fig. 1).

As to claim 8, Yeap further teaches said preexisting format further comprises Extended Markup Language (paragraph 0045).

As to claim 9, Yeap further teaches a user terminal containing said first application program (paragraphs 0019 and 0023).

As to claim 10, Yeap further teaches said publically accessible digital data communication network further comprises the Internet (Fig. 1).

As to claim 11, Yeap teaches an apparatus comprising:
first application program means for providing a user interface (paragraph 0019 and 0023);

second application program means responsively coupled to said first application program means for offering a data processing service (Fig. 1 and associated specification);

data object means responsively coupled to said first application program means having a location and a format (paragraphs 0006-0008, 0020, 0065, 0068, and 0076); and

message generation means responsively coupled to said first application program means for preparing a message having a preexisting format for transfer of said location and format of said data object means from first application program means to said second application program means (paragraphs 0065, 0068 and 0076).

As to claim 12, Yeap further teaches generating a second service request (paragraphs 0063-0064).

As to claim 13, Yeap further teaches publically accessible digital data communication network means for responsively coupling said first application program means and said second application program means (Fig. 1).

As to claim 14, Yeap further teaches wherein said publically accessible digital data communication network means further comprises the Internet (Fig. 1).

As to claim 15, Yeap further teaches said preexisting format further comprises Extended Markup Language (paragraph 0045).

As to claim 16, Yeap teaches (Fig. 1 and associated specification) a data processing system having a first application program located within a first computer and having a data base with a first format responsively coupled to a second application

program located within a second computer and having a legacy data base with a second format, the improvement comprising:

 a data object having an indication of a location and an indication of said second format (paragraphs 0006-0008, 0020, 0065, 0068, and 0076);

 a message having a preexisting format for transfer from said first application program to said second application program (paragraph 0042); and

 wherein said message contains said location and format (paragraphs 0065, 0068 and 0076).

As to claim 17, Yeap further teaches a publically accessible digital data communication network which responsively couples said first application program to said second application program (Fig. 1).

As to claim 18, Yeap further teaches said publically accessible digital data communication network further comprises the Internet (Fig. 1).

As to claim 19, Yeap further teaches a user terminal housing said first application program (paragraphs 0019 and 0023).

As to claim 20, Yeap further teaches said preexisting format further comprises Extended Markup Language (paragraph 0045).

As to claim 21, Yeap teaches an apparatus comprising:

 a user terminal having a first application program (paragraphs 0019 and 0023);

 a second application program responsively coupled to said first application program via a publically accessible digital data network (Fig. 1 and associated specification);

a message having a preexisting Extended Markup Language format generated by said first application program for transfer to said second application program (paragraphs 0042 and 0045);

a data object responsive coupled to said first application program having a location and having a second format which is incompatible with said preexisting Extended Markup Language (paragraphs 0006-0008, 0020, 0065, 0068, and 0076); and wherein said message contains a definition of said location and said second format (paragraphs 0065, 0068 and 0076).

Response to Arguments

4. Applicant's arguments have been fully considered but they are not persuasive.

Applicant argues that Yeap does not teach applications located within a legacy database management system (Remarks, last paragraph page 12). In response, Yeap teaches (Fig. 1 and associated specification) multiple applications 112 having a database 120 which could be any type of database (paragraphs 0027-28) and applications within system 150 (paragraph 0030), and all of these applications communicate within an enterprise system 100. The reference meets the limitation as claimed.

Applicant argues that Yeap does not teach incompatible data formats (Remarks, first paragraph page 13). In response, Yeap teaches (paragraph 0007) the information stored in an eBusiness application database is in a different format or arrangement than

the related information stored in a corresponding legacy system database. The reference meets the limitation as claimed.

Applicant argues that Yeap does not teach data objects (Remarks, second paragraph page 14). In response, Yeap teaches data referred as objects (paragraph 0037). The reference meets the limitation as claimed.

Applicant argues that Yeap does not teach second application program having a legacy database with an incompatible format (Remarks, last paragraph page 15). In response, Yeap teaches applications within system 150 and an associated legacy database 160 (paragraph 0030) having incompatible format (paragraph 0007). The reference meets the limitation as claimed.

Applicant argues that Yeap does not teach user terminal (Remarks, second complete paragraph page 17). In response, Yeap teaches a front-end interface that is used to managing data (paragraph 0023). The reference meets the limitation as claimed.

Applicant argues that Yeap does not teach user interface (Remarks, second complete paragraph page 18). In response, Yeap teaches a front-end interface that is used to managing data (paragraph 0023). The reference meets the limitation as claimed.

Applicant argues that Yeap does not teach a second application program coupled to the first application program for offering data processing service (Remarks, third complete paragraph page 18). In response, Yeap teaches applications within system 150 (paragraph 0030) coupled to another application via network for providing

data processing service (Fig. 1 and associated specification). The reference meets the limitation as claimed.

Applicant argues that Yeap does not teach second format (Remarks, last incomplete paragraph page 18 continue to page 18). In response, Yeap teaches applications within system 150 and an associated legacy database 160 (paragraph 0030) having incompatible format (paragraph 0007). The reference meets the limitation as claimed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andy Ho whose telephone number is (571) 272-3762. A

voice mail service is also available for this number. The examiner can normally be reached on Monday – Friday, 8:30 am – 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng An can be reached on (571) 272-3756.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 571-272-2100.

Any response to this action should be mailed to:

Commissioner for Patents

P.O Box 1450

Alexandria, VA 22313-1450

Or fax to:

- AFTER-FINAL faxes must be signed and sent to (571) 273 - 8300.
- OFFICAL faxes must be signed and sent to (571) 273 - 8300.
- NON OFFICAL faxes should not be signed, please send to (571) 273 – 3762
